Email | YouTube | GitHub | LinkedIn

I am a machine learning researcher, interested in graph learning, vision transformers, and 3D reconstruction. My prior academic experience includes developing and teaching computer science courses at Sydney Polytechnic Institute and University of Hail.

Education

Doctor of Philosophy - PhD, Computer Science, *The University of Sydney*, *2017 — 2021*
Thesis title: Graph Filtering and Automatic Parameter Selection for Efficient Spectral Clustering

Master of Science, Computer Science, *King Fahd University of Petroleum and Minerals (KFUPM)*, *2013 — 2016*
Thesis title: Human In-Place Action Recognition using Combination of Kinect Data Streams

Bachelor of Science, Computer Science, *University of Hail,* *2005 — 2010*

Skills

Research & Development	A leading author on 13+ research papers, with 100+ verified reviews on ORCID.
Technical	Proficient in Python and its ML libraries (PyTorch, JAX, PyG), with prior experience in Java and MATLAB.
Curriculum design	Designing CS courses following Australian Qualifications Framework (AQF) and Saudi Arabia's NCAAA.
Social media	My educational YouTube videos have accumulated over 900 watch hours.

Professional Experience

Machine Learning Researcher *Sep 2023 — Present*
Independent Researcher *Riyadh, Saudi Arabia*

- Working on machine learning research with researchers from the University of Sydney and KFUPM.
- Our research focuses on Graph Neural Networks (GNNs) and 3D reconstruction.
- Creating YouTube tutorials on Python ML experiments using PyTorch, JAX, PyG, Flax, and scikit-learn.

Curriculum Development Collaborator *Jul 2023 — Present*
Sydney Polytechnic Institute *Remote*

- Participated in curriculum development for a Master of Data Science and Bachelor of Computing.
- Designed the outline and planner documents for courses: Database Systems (U211), Cybersecurity and Information Assurance (U312), and Full-stack development (U322).

Assistant Professor *Jan 2021 — Sep 2023*
University of Hail *Hail, Saudi Arabia*

- Participated in curriculum design and lecturing for multiple graduate and undergraduate computer science courses.
- Adapted new teaching strategies to teach the following courses: data structures (ICS202), advanced database (ICS434), and machine learning for big data (CSAI510).

Curriculum Development Collaborator *Sep 2020 — Mar 2021*
Sydney Polytechnic Institute *Sydney, Australia*

- Participated in curriculum development for a Master of Data Science.
- Designed lecture slides, assignments, practical sessions, and exams for courses: Database Systems and Infrastructure (MDS604), Mathematics for data science (MDS602), and Artificial Intelligence and Innovation (MDS607).

System Engineer *Aug 2010 — May 2012*
SABIC *Jubail, Saudi Arabia*

- In charge of securing and maintaining the plant network components.
- Successfully upgraded obsolete network components while maintaining uninterrupted plant operations.

Intern *Jun 2009 — Jan 2010*
Saudi Aramco *Dhahran, Saudi Arabia*

- Completed cooperative training at EXPEC ARC as a member of the computational modeling team.
- Developed a GUI interface populating the simulator output, large text files, into a database.

Selected Projects

VisionTransformer-MNIST **video** | **code**

- Implementation of a Vision Transformer (ViT) model, which was based on the paper “An Image is Worth 16x16 Words: Transformers for Image Recognition at Scale”, by Google research.

Graph Convolutional Networks (GCNs) **video** | **code**

- Implementation of “Semi-Supervised Classification with Graph Convolutional Networks”. Graph Convolutional Networks (GCNs) perform node classification on graphs.

Neural Radiance Fields (NeRF) **video** | **code**

- I performed 3D reconstruction experiments using recent NeRF advancements such as Mip-NeRF 360. Compute resources for these experiments were provided by Google Cloud TPUs and Lightning AI GPUs.

SWIN Transformer **video** | **code**

- The Swin Transformer is usually used as a backbone for various downstream tasks in computer vision. I explained the Swin Transformer's code and demonstrated attention visualization.

GNN Training with Mini-Batches **video** | **code**

- Mini-batching nodes on a graph is not straightforward, because graph data is interconnected. In this tutorial series, I covered techniques for creating mini-batches for Graph Neural Network (GNN) training.
