

Mashaan Alshammari | مشعان عواد الشمري

[Phone](#) | [Email](#) | [YouTube](#) | [LinkedIn](#) | [Website](#)

I am a machine learning researcher with experience in graph neural networks and vision transformers. My prior academic experience includes developing and teaching computer science courses at Sydney Polytechnic Institute and University of Hail.

EDUCATION

Doctor of Philosophy - PhD, Computer Science, The University of Sydney, 2017 – 2021
Thesis title: [Graph Filtering and Automatic Parameter Selection for Efficient Spectral Clustering](#)

Master of Science, Computer Science, King Fahd University of Petroleum and Minerals (KFUPM), 2013 – 2016
Thesis title: [Human In-Place Action Recognition using Combination of Kinect Data Streams](#)

SKILLS

Research & Development Lead author of [13+ research papers](#), with [150+ verified reviews](#) on ORCID.

Technical Experienced with ML frameworks (PyTorch, JAX), and formerly used Java and MATLAB.

Curriculum design Designing CS courses following Australia's (AQF) and Saudi Arabia's (NCAAA).

Social media My educational [YouTube](#) videos have accumulated over 2.1K watch hours.

PROFESSIONAL EXPERIENCE

Machine Learning Researcher Sep 2023 – Present
Independent Researcher Riyadh, Saudi Arabia

- Creating YouTube tutorials on Python ML experiments using PyTorch, JAX, Flax, and scikit-learn.
- Working on machine learning research with researchers from the University of Sydney and KFUPM.
- Our research focuses on Graph Neural Networks (GNNs) and 3D reconstruction.

Curriculum Development Collaborator Jul 2023 – Nov 2024
Sydney Polytechnic Institute Remote

- Participated in curriculum development for a Master of Data Science and Bachelor of Computing.
- Designed the outline and planner documents for courses: Database Systems (U211), Cybersecurity and Information Assurance (U312), and Full-stack development (U322).

Assistant Professor Jan 2021 – Sep 2023
University of Hail Hail, Saudi Arabia

- Participated in curriculum design and lecturing for multiple graduate and undergraduate computer science courses.
- Adapted new teaching strategies to teach the following courses: data structures (ICS202), advanced database (ICS434), and machine learning for big data (CSAI510).

Curriculum Development Collaborator Sep 2020 – Mar 2021
Sydney Polytechnic Institute Sydney, Australia

- Participated in curriculum development for a Master of Data Science.
- Designed lecture slides, assignments, practical sessions, and exams for courses: Database Systems and Infrastructure (MDS604) and Mathematics for data science (MDS602).

System Engineer Aug 2010 – May 2012
SABIC Jubail, Saudi Arabia

- In charge of securing and maintaining the plant network components.
- Successfully upgraded obsolete network components while maintaining uninterrupted plant operations.

SELECTED PROJECTS

VisionTransformer-MNIST

[video](#) | [post](#)

Implementation of a Vision Transformer (ViT) model, which was based on the paper "An Image is Worth 16x16 Words: Transformers for Image Recognition at Scale".

Graph Convolutional Networks (GCNs)

[video](#) | [post](#)

Implementation of "Semi-Supervised Classification with Graph Convolutional Networks". Graph Convolutional Networks (GCNs) perform node classification on graphs.

SWIN Transformer

[video](#) | [post](#)

The SWIN Transformer is usually used as a backbone for various downstream tasks in computer vision. I explained the SWIN Transformer's code and demonstrated attention visualization.

Neural Radiance Fields (NeRF)

[video](#) | [post](#)

I performed 3D reconstruction experiments using recent NeRF advancements such as Mip-NeRF 360. Compute resources for these experiments were provided by Google Cloud TPUs and Lightning AI GPUs.

DINOv2 Architecture Analysis

[video](#) | [post](#)

I ran an experiment exploring the architecture of DINOv2, which includes the ViT backbone, DINO head, and iBOT head. I also wrote a blog post with visualizations of tensor shapes inside DINO.
