Email | YouTube | GitHub | LinkedIn

I am a machine learning researcher, interested in graph learning, vision transformers, and 3D reconstruction. My prior academic experience includes developing and teaching computer science courses at Sydney Polytechnic Institute and University of Hail.

### **EDUCATION**

Doctor of Philosophy - PhD, Computer Science, The University of Sydney,
Thesis title: Graph Filtering and Automatic Parameter Selection for Efficient Spectral Clustering

Master of Science, Computer Science, King Fahd University of Petroleum and Minerals (KFUPM),
Thesis title: Human In-Place Action Recognition using Combination of Kinect Data Streams

Bachelor of Science, Computer Science, University of Hail,

2005 – 2010

## SKILLS

Research & Development Technical Curriculum design Social media A leading author on 13+ research papers, with 100+ verified reviews on ORCID.

Proficient in Python and its ML libraries (PyTorch, JAX, PyG), with prior experience in Java and MATLAB. Designing CS courses following Australian Qualifications Framework (AQF) and Saudi Arabia's NCAAA. My educational YouTube videos have accumulated over 800 watch hours.

### PROFESSIONAL EXPERIENCE

### Machine Learning Researcher Independent Researcher

Sep 2023 — Present Riyadh, Saudi Arabia

- Working on machine learning research with researchers from the University of Sydney and KFUPM.
- Our research focuses on Graph Neural Networks (GNNs) and 3D reconstruction.
- Creating YouTube tutorials on Python ML experiments using PyTorch, JAX, PyG, Flax, and scikit-learn.

## Curriculum Development Collaborator Sydney Polytechnic Institute

Jul 2023 — Present

Remote

- Participated in curriculum development for a Master of Data Science and Bachelor of Computing.
- Designed the outline and planner documents for courses: Database Systems (U211), Cybersecurity and Information Assurance (U312), and Full-stack development (U322).

## Assistant Professor University of Hail

Jan 2021 — Sep 2023 Hail, Saudi Arabia

- Participated in curriculum design and lecturing for multiple graduate and undergraduate computer science courses.
- Adapted new teaching strategies to teach the following courses: data structures (ICS202), advanced database (ICS434), and
  machine learning for big data (CSAI510).

## Curriculum Development Collaborator Sydney Polytechnic Institute

Sep 2020 - Mar 2021

Sydney, Australia

- Participated in curriculum development for a Master of Data Science.
- Designed lecture slides, assignments, practical sessions, and exams for courses: Database Systems and Infrastructure (MDS604), Mathematics for data science (MDS602), and Artificial Intelligence and Innovation (MDS607).

# System Engineer SABIC

Aug 2010 - May 2012

Jubail, Saudi Arabia

- In charge of securing and maintaining the plant network components.
- Successfully upgraded obsolete network components while maintaining uninterrupted plant operations.

## Intern

Jun 2009 — Jan 2010 Dhahran, Saudi Arabia

## Saudi Aramco

- Completed cooperative training at EXPEC ARC as a member of the computational modeling team.
- Developed a GUI interface populating the simulator output, large text files, into a database.

## SELECTED PROJECTS

## My YouTube Channel

pytorch, jax, Jupyter

- I create videos explaining machine learning methods. The video starts by reading a paper or a book and ends with a code.
- I cover topics like how a convolutional layer is implemented as matrix multiplication in pytorch.

#### VisionTransformer-MNIST

ViT, pytorch, Jupyter

- Implementation of "An Image is Worth 16x16 Words: Transformers for Image Recognition at Scale", by Google research.
- Vision transformers replace CNNs as the preferred method for image classification.

#### **Graph Convolutional Networks (GCNs)**

GNNs, GCNs, pytorch, Jupyter

- Implementation of "Semi-Supervised Classification with Graph Convolutional Networks", which was published in ICLR2017.
- Graph Convolutional Networks (GCNs) perform node classification in graphs.

**ADDA** 

GANs, pytorch, Jupyter

- Implementation of the paper "Adversarial Discriminative Domain Adaptation", which was published in CVPR 2017.
- ADDA uses GANs to perform unsupervised domain adaptation (UDA).

### SELECTED PUBLICATIONS

- <u>Mashaan Alshammari</u>, John Stavrakakis, Adel F. Ahmed, Masahiro Takatsuka: "Graph Construction using Principal Axis Trees for Simple Graph Convolution.", arXiv:2302.12000, 2023.

- Mashaan Alshammari, Masahiro Takatsuka: "Approximate spectral clustering with eigenvector selection and self-tuned k.", Pattern Recognition Letters, 2019.

## SELECTED ACTIVITIES

## Journal Reviewer

- Pattern Recognition Journal
- Neurocomputing Journal
- Information Sciences Journal

#### **Conference Organization**

- Program committee, 30th International Conference on Neural Information Processing (ICONIP2023), Changsha, China, November 20-23, 2023.
- Technical Program Committee, 7th International Conference on Data Science and Machine Learning Applications (CDMA2022), Riyadh, Saudi Arabia, March 1-3, 2022.
